

AndreaCare Striae

Pflege-Crème – Beugt Dehnungsstreifen vor und pflegt die strapazierte Haut

Was ist AndreaCare Striae?

AndreaCare Striae ist eine Crème zur Vorbeugung von Dehnungsstreifen. Diese können während der Schwangerschaft häufig auftreten. Am Anfang sind die Streifen rosafarben, danach werden sie blaurot-violett und einige Monate später elfenbeinfarbig. Sie bilden sich nicht mehr zurück und sind somit immer als Narben sichtbar. Betroffen sind v. a. Bauch, Oberschenkel, Po und Brust.

Dehnungsstreifen können auch in der Pubertät, bei schnellem Wachstum oder bei plötzlicher Gewichtszunahme auftreten. Gegen Dehnungsstreifen hilft nur rechtzeitiges Vorbeugen.

AndreaCare Striae Pflege-Crème enthält wertvolle Inhaltsstoffe, welche die strapazierte Haut optimal versorgen:

- Pflanzenauszug aus Tigergras beugt Dehnungsstreifen vor und erhöht die Festigkeit und Elastizität der Haut.
- Mandelöl und Dexpanthenol spenden der Haut Feuchtigkeit und schützen sie vor dem Austrocknen.
- Natürliches Bisabolol beruhigt die Haut.

AndreaCare Striae enthält keine Zusatzstoffe wie Hormone, synthetische Emulgatoren oder Parabene.

Wann wird AndreaCare Striae angewendet?

2 x täglich je 2.5 ml (= 2 Haselnussgrößen) auf die betroffenen Körperpartien (Bauch, Oberschenkel, Po und Brust) auftragen und mit kreisenden Bewegungen sanft einmassieren.

Bei Anwendung in der Schwangerschaft empfiehlt es sich, AndreaCare Striae bereits ab dem 4. Schwangerschaftsmonat bis etwa 3 Monate nach der Geburt einzureiben.

In der Stillzeit muss vor dem Ansetzen des Säuglings die an den Brustwarzen haftende Crème sorgfältig und vollständig entfernt werden.

Weitere Hinweise

Die Hautverträglichkeit von AndreaCare Striae Pflege-Crème wurde dermatologisch bestätigt. Für Kinder unzügänglich aufzubewahren. Bei Raumtemperatur, nicht über 25° C lagern. AndreaCare Striae ist von swissveg für Veganer zertifiziert (Lizenzznummer CH-P3070011).

Was ist in AndreaCare Striae enthalten?

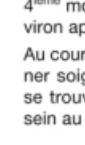

Bestandteile (INCI)

Aqua, Cetearyl Alcohol, Glycerin, Prunus Amygdalus Dulcis Oil, Isoamyl Laurate, Sodium Cet phosphate, Phenethyl Alcohol, Potassium Phosphate, Coumarin.

AndreaCare Striae

Crème de soin – prévient la formation de vergetures et soigne la peau stressée

Qu'est-ce qu'AndreaCare Striae?

AndreaCare Striae est une crème de prévention des vergetures. Celles-ci apparaissent souvent pendant la grossesse. Au début, les stries sont roses avant de devenir violacées et blanches quelques mois plus tard. Elles ne régressent plus et forment donc des cicatrices toujours visibles, principalement sur le ventre, les cuisses, les fesses et la poitrine.

Les vergetures peuvent également apparaître à la puberté, lors d'une croissance ou d'une prise de poids rapide. Seuls des soins préventifs précoce peuvent permettre d'éviter les vergetures.

La crème de soin AndreaCare Striae contient des substances précieuses soignant la peau stressée d'une manière optimale:

- Les extraits végétaux de l'herbe du tigre préviennent les vergetures et augmentent la fermeté et l'élasticité de la peau.
- L'huile d'amande et le dexpanthenol hydratent la peau et la protègent du dessèchement.
- Le bisabolol naturel calme la peau.

AndreaCare Striae ne contient aucun additif comme des hormones, des émulsifiants synthétiques ou des parabènes.

Quand utiliser AndreaCare Striae?

Appliquer 2 x par jour chaque fois 2.5 ml (= 2 tailles de noisette) sur les parties du corps touchées (ventre, cuisses, fesses et poitrine) et faire pénétrer en massant doucement par mouvements circulaires. Pendant la grossesse il est recommandé d'utiliser AndreaCare Striae dès le

4^{ème} mois de la grossesse et jusqu'à 3 mois environ après l'accouchement.

Au cours de la période d'allaitement, il faut éliminer soigneusement et entièrement la crème qui se trouve sur les mamelons avant de donner le sein au nourrisson.

Autres remarques

La tolérance cutanée de la crème de soin AndreaCare Striae a été confirmée par des tests dermatologiques. Tenir hors de portée des enfants.

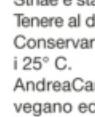

À conserver à une température ambiante pas au-dessus de 25° C.

AndreaCare Striae convient à un mode de vie végétalien et est certifié par swissveg (numéro de licence CH-P3070011).

AndreaCare Striae

Crema - Previene le smagliature e cura la pelle stressata

Che cos'è AndreaCare Striae?

AndreaCare Striae è una crema per la prevenzione delle smagliature, che possono comparire di frequente durante la gravidanza. Le smagliature sono inizialmente di colore rosa, poi diventano rosso porpora tendente al viola e alcuni mesi dopo assumono una colorazione bianco avorio. Esse non regrediscono, restano quindi cicatrici sempre visibili. Le zone colpite dalle smagliature sono soprattutto la pancia, le cosce, il sedere e il seno.

Le smagliature possono comparire anche durante la pubertà, nel caso di un rapido sviluppo o di un brusco aumento di peso. L'unico rimedio contro le smagliature è la prevenzione tempestiva.

La crema AndreaCare Striae contiene sostanze preziose che si prendono cura della pelle stressata in modo ottimale:

- L'estratto vegetale di centella asiatica previene la formazione delle smagliature, aumentando la resistenza e il grado di elasticità della pelle.
- L'olio di mandorle e il dexpanthenolo idratano la pelle proteggendola dalla secchezza.
- Il bisabololo naturale ha un effetto calmante sulla pelle.

AndreaCare Striae non contiene additivi quali ormoni, emulsionanti sintetici o parabeni.

Quando si usa AndreaCare Striae?

Applicare 2.5 ml (pari alla grandezza di 2 nocciole) due volte al giorno sulle zone interessate (pancia, cosce, sedere e seno) e massaggiare delicatamente con movimenti circolari.

Durante la gravidanza si consiglia di utilizzare AndreaCare Striae già a partire dal 4° mese di gravidanza, proseguendo per circa 3 mesi dopo il parto.

Durante il periodo dell'allattamento, prima di attaccare il bambino al seno, la crema presente sui capezzoli deve essere accuratamente e completamente rimossa.

Di che cosa occorre inoltre tenere conto

La tollerabilità cutanea della crema AndreaCare Striae è stata confermata da test dermatologici.

Tenere al di fuori dalla portata dei bambini.

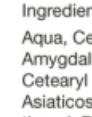

Conservare a temperatura ambiente non oltre i 25° C.

AndreaCare Striae è adatto a uno stile di vita vegano ed è certificato da swissveg (numero di licenza CH-P3070011).

AndreaCare Striae

Cream - Prevents stretch marks and cares for stressed skin

What is AndreaCare Striae?

AndreaCare Striae is a cream to prevent stretch marks. These can often appear during pregnancy. At first, the marks are pink and then turn purple / violet and, a few months later, ivory coloured. They do not wear off and are therefore always visible as scars. Mainly affected are the belly, thighs, buttocks and breasts.

Stretch marks may also occur during puberty, or with rapid growth or sudden weight gain. Only timely prevention will help against stretch marks.

AndreaCare Striae Cream contains valuable ingredients that optimally replenish stressed skin:

- Herbal extract from tiger grass prevents stretch marks and increases firmness and elasticity of the skin.
- Almond oil and dexpanthenol provide the skin with moisture and protect it from drying out.
- Natural bisabolol soothes the skin.

AndreaCare Striae contains no additives such as hormones, synthetic emulsifiers or parabens.

When is AndreaCare Striae used?

Apply 2.5 ml (= 2 hazelnut-sized amounts) twice daily to the affected body areas (belly, thighs, buttocks and chest) and gently massage in with circular movements.

During pregnancy AndreaCare Striae is recommended for use as early as the 4th month of pregnancy until about 3 months after delivery.

When breastfeeding, any cream still adhering to the nipples must be carefully and completely removed before putting the baby to your breast.

Further information

The skin compatibility of AndreaCare Striae Cream has been dermatologically confirmed. Keep out of reach of children.

Store at room temperature no higher than 25° C.

AndreaCare Striae is suitable for a vegan lifestyle and is certified by swissveg (license number CH-P3070011).
